

Summary

Back to Screening Dashboard

Step 1: Exposure of the project location

Sr No.	Name	Email
1	Test	test@test.com

Step 2: Impacts on the project's physical infrastructure and assets

Subsectors:

Livestock

Moderate

Step 3A: Modulation of Risks by Soft Components

Soft Components:

Capacity building, training and outreach

Data gathering, Monitoring and Information management systems

Emergency Planning

Modulation of risks by project soft components:

Women identified as particularly vulnerable:

Components designed to help alleviate risks to women:

Step 3B: Modulation of Risks by the Project's Development Context

Step 4: Risk to the Outcome/Service Delivery of the Project

Moderate

Notes: The overall potential impact on investments is moderate. While the soft components slightly reduce the level of impact, the development context will significantly increase impacts as there are low levels of adaptive capacity. This elevates the overall risk rating from Low to Moderate.
